

Requirements

Environment

The project was tested on Windows 11. The scripts are standard Python programs and should also run on Linux or macOS provided that the same package versions are installed.

Python version used for the final submission: 3.12.13.

- numpy==2.4.4
- pandas==3.0.1
- scikit-learn==1.8.0
- scipy==1.17.1
- matplotlib==3.10.9

Installation

A clean environment should install dependencies from requirements.txt rather than relying on the optional local vendor cache.

Command

```
python -m pip install -r requirements.txt
```

Repository Assumptions

- Run commands from the project root directory.
- Datasets should be stored in data/ using the filenames documented in data/README.md.
- Final generated outputs are written to outputs/final_run/.
